

VARUN SHAKYA

Gandhinagar, Gujarat • 9904793827 • varunshakya1794@gmail.com • [GitHub](#) • [Kaggle](#)

Summary

Motivated Computer Science student with hands-on experience in **Python, SQL, Machine Learning, Data Analysis, and Data Visualization** through academic and personal projects. Skilled in using **NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, and Streamlit** to build predictive models and interactive analytics applications. Interested in applying analytical and technical skills to **AI, Machine Learning, Data Science, and data-driven problem solving**.

Education

Parul University

Bachelor of Technology, Computer Science

Sept 2023 – Present

Vadodara, Gujarat

Kendriya Vidyalaya Gandhinagar Cantt

Class 12th

June 2022

Gandhinagar, Gujarat

Technical Skills

Languages: Python, SQL, HTML, CSS

Libraries / Frameworks: NumPy, Pandas, Matplotlib, Seaborn, Plotly, Scikit-learn, Streamlit, Flask

Tools: Jupyter Notebook, Google Colab, Kaggle, Git, GitHub

Concepts: Machine Learning, Data Analysis, Data Visualization, Exploratory Data Analysis (EDA), Feature Engineering, Model Evaluation

Projects

Placement Predictor | Python, Pandas, NumPy, Scikit-learn, Streamlit [GitHub](#) | [Live](#)

- Built a placement prediction system using academic and profile-related student data.
- Applied data preprocessing, feature engineering, model training, and hyperparameter tuning for predictive modeling.
- Developed an interactive **Streamlit** interface for user-friendly prediction and deployment.

AI-based ATS Resume Optimizer | Python, Streamlit, Gemini API, ReportLab [GitHub](#) | [Live](#)

- Built a resume optimization application that improves resumes based on target job descriptions.
- Implemented keyword extraction, ATS-friendly rewriting, and keyword match analysis.
- Added PDF export functionality using **ReportLab** for downloadable optimized resumes.

Formula 1 Maps | Python, Flask, FastF1, Matplotlib, NumPy [GitHub](#) | [Live](#)

- Built a telemetry visualization app for Formula 1 session data using **Flask** and **FastF1**.
- Generated speed maps and corner maps to analyze driver behavior and track performance.
- Used data visualization techniques to convert raw race telemetry into interpretable insights.

IPL Fantasy Predictor | Python, Pandas, Scikit-learn, Streamlit [GitHub](#) | [Live](#)

- Built an IPL fantasy prediction system using historical player and match data.
- Developed separate batter and bowler models using preprocessing, feature engineering, and model evaluation.
- Created a **Streamlit**-based interface for fantasy score prediction and player analysis.

Additional Information

- Solved **137+** problems on [LeetCode](#) covering data structures, algorithms, and problem-solving fundamentals.
- Interested in **AI, Machine Learning, Data Science, and Sports Analytics**.
- Familiar with **GitHub project hosting**, version control, and self-learning technical workflows.
- Actively building projects in **ML, data analysis, visualization, and predictive systems**.
